Lab-1

1- Write a C program to input the length and width of a rectangle and find the area of the given rectangle.

2- Write a C program to input two numbers and perform all arithmetic operations. How to perform all arithmetic operations between two numbers in C programming. C program to find sum, difference, product, quotient and modulus of two given numbers.

3- Write a C program to input principle, time and rate (P, T, R) from the user and find Simple Interest. Calculate simple interest in C programming.

4- Write a C program to input temperature in Centigrade and convert to Fahrenheit.

5- Write a C program to input the radius of a circle from the user and find diameter, circumference and area of the circle.
